## *Industry Certification – 3-Year Strategic Plan*

### 3-Year Strategic Plan (Florida Statute 1003.493)

---

The 3-Year Strategic Plan outlines specific strategies and goals that the school and teacher(s) will implement to improve the pass rate for the specified industry certification exam. This plan is a statutory requirement for industry certification exams within individual academies that do not exceed the state-established 50% minimum pass rate.

All strategies will be implemented during the first year of the strategic plan to meet the 2017-2018 goal pass rate (minimum 60%). Data will be monitored and additional strategies implemented (as needed) through the 2018-2019 school year to increase certification pass rates each year until the district expectation of 80% is achieved.

Academies that fail to meet the established goal pass rate during each year of the strategic plan will lose their academy status for the next school year, therefore forfeiting teacher bonus pay, CAPE funding, and school grade points for the specified industry certification. Additionally, teacher(s) will be required to complete applicable professional development, and re-draft a strategic plan before the school is permitted to reinstate the CAPE Academy or Career Themed Course.

## *Industry Certification – 3-Year Strategic Plan*

I understand that I am responsible for my students' success on the industry certification exam, and will work to support their mastery and certification attainment throughout the school year. I also understand that failure to meet the projected Goal Pass Rates will result in loss of academy status for the following school year.
