

Having more than one student using a Chromebook:

If you or a sibling are having difficulty getting into Google Classroom, or Drive on the “family” Chromebook, it is more than likely that they did not **logout** of all things Chrome and Google before going in as their school username and password. If they are using a Chromebook, they **must** log off.

To do that, they will need to select the **time at the bottom right**.

Click on **Sign Out**.

If they do not do this, then the Chromebook will hold on to the current username and password.

This will need to be done each time they **switch users**.
