

Symptom Screening Checklist For Anyone Entering the Building

The person conducting screenings should maintain a six foot distance while asking questions. Ask each person entering the building the following questions prior to entering the facility or school transportation vehicle.

Anyone showing symptoms of COVID-19 or who may have been exposed to COVID-19 should not be at school.

1. Have you had close contact (within six feet for at least 15 minutes) in the last 14 days with someone diagnosed with COVID-19, or has any health department or health care provider been in contact with you and advised you to quarantine?

- Yes ▶ The person should not be at school. The person can return 14 days after the last time they had close contact with someone with COVID-19, or as listed below.
- No ▶ The person can be at school if they are not experiencing symptoms.

2. Since you were last at school, have you had any of these symptoms?

- | | | |
|--|---|---|
| <input type="checkbox"/> Fever | <input type="checkbox"/> Congestion or runny nose | <input type="checkbox"/> Headache |
| <input type="checkbox"/> Chills | <input type="checkbox"/> Fatigue | <input type="checkbox"/> Nausea and vomiting |
| <input type="checkbox"/> Shortness of breath or difficulty breathing | <input type="checkbox"/> Muscle or body aches | <input type="checkbox"/> Diarrhea |
| <input type="checkbox"/> New cough | <input type="checkbox"/> Sore throat | <input type="checkbox"/> New loss of taste or smell |

If a person has a fever of 100.4 or greater or has two or more of these symptoms they should go home, stay away from other people and call their health care provider.

3. Since you were last at school, have you been diagnosed with COVID-19?

- Yes | If a person is diagnosed with COVID-19 based on a test or their symptoms, or does not get a COVID-19 test but has had symptoms, they should not be at school and should stay home until they meet the criteria below.
- No

Entering School

A person can enter the school if he/she can answer YES to ALL THREE questions:

- Has it been at least 10 days since the person first had symptoms?
- Has it been at least 3 days since the person had a fever (without using fever-reducing medicine)?
- Has it been at least 3 days since the person's symptoms have improved, including cough and shortness of breath?

If a person has been diagnosed with COVID-19 but does not have symptoms, they should remain out of school until 10 days have passed since the date of their first positive COVID-19 diagnostic test, assuming they have not subsequently developed symptoms since their positive test.

If a person has not been determined to have been in close contact with someone diagnosed with COVID-19, they should remain out of school for 14 days since the last known contact, unless they test positive, in which case the above criteria would apply. They must complete the full 14 days of quarantine even if they test negative.
