

Symptom Screening Checklist For Elementary School Students

The person conducting screenings should maintain a six foot distance while asking questions. Ask the person dropping off the child the following questions before entering the facility or school transportation vehicle. If no person is accompanying the child during dropoff, use your best judgement if the child can respond on their own.

Anyone showing symptoms of COVID-19 or who may have been exposed to COVID-19 should not be at school.

1. Have any of the children you are dropping off had close contact (within six feet for at least 15 minutes) in the last 14 days with someone diagnosed with COVID-19, or has any health department or health care provider been in contact with you and advised you to quarantine?

- Yes ▶ The child should not be at school. The child can return 14 days after the last time they had close contact with someone with COVID-19, or as listed below
- No ▶ The child can be at school if they are not experiencing symptoms

2. Do any of the children you are dropping off have any of these symptoms?

- | | | |
|--|---|---|
| <input type="checkbox"/> Fever | <input type="checkbox"/> Congestion or runny nose | <input type="checkbox"/> Headache |
| <input type="checkbox"/> Chills | <input type="checkbox"/> Fatigue | <input type="checkbox"/> Nausea and vomiting |
| <input type="checkbox"/> Shortness of breath or difficulty breathing | <input type="checkbox"/> Muscle or body aches | <input type="checkbox"/> Diarrhea |
| <input type="checkbox"/> New cough | <input type="checkbox"/> Sore throat | <input type="checkbox"/> New loss of taste or smell |

If a person has a fever of 100.4 or greater or has two or more of these symptoms they should go home, stay away from other people and call their health care provider.

3. Since they were last at school, have any of the children you are dropping off been diagnosed with COVID-19?

- Yes | If a child is diagnosed with COVID-19 based on a test or their symptoms, or does not get a COVID-19 test but has had symptoms, they should not be at school and should stay home until they meet the criteria below.
- No

Returning to School

A child can return to school when a family member can ensure that they can answer YES to ALL THREE questions:

- Has it been at least 10 days since the child first had symptoms?
- Has it been at least 3 days since the child had a fever (without using fever-reducing medicine)?
- Has it been at least 3 days since the child's symptoms have improved, including cough and shortness of breath?

If a child has been diagnosed with COVID-19 but does not have symptoms, they should remain out of school until 10 days have passed since the date of their first positive COVID-19 diagnostic test, assuming they have not subsequently developed symptoms since their positive test.

If a child has not been determined to have been in close contact with someone diagnosed with COVID-19, they should remain out of school for 14 days since the last known contact, unless they test positive, in which case the above criteria would apply. They must complete the full 14 days of quarantine even if they test negative.
