**Parent Information for Requesting Special Diets**  
School Year 2019-2020

### **Student Nutrition Overview**

The Food & Nutrition Services Department (FNS) strives to offer healthy, well-balanced meals to all of our students. All meals must meet the strict nutritional standards for the National School Lunch and Breakfast program set forth by USDA. To constitute a reimbursable breakfast or lunch, students must select at least 3 of the 5 components offered: meat/protein, bread, fruit, vegetable, and milk. At both meals, one of the components must be either a fruit or a vegetable.

### **General Information Regarding Special Diets**

Food substitutions/menu modifications may be requested for children with special dietary condition(s) by using FNS's ***Diet Prescription for Special Meals***. School nutrition managers can use foods from typical meal lists to meet most diet modifications that are requested. However, when necessary we will utilize specialized items to ensure a safe mealtime environment for your child. If a student needs to eliminate an item such as milk from the diet, then he/she may either choose to drink portable water free of charge or choose to purchase another type of drink. Milk is required to be offered to all children, but it is not mandatory that a child takes milk for a complete meal. With most diets, we are able to prepare and serve flavorful menu items to your child that meets his or her special need, while still following federal guidelines for school meals.

### **Completing the Diet Prescription Form**

It is imperative that the ***Diet Prescription for Special Meals*** is completed correctly and given to the Nurse or Clinic Aide at your school so we can safely serve your child. Food substitutions/menu modifications **cannot** be made without a completed form.

### **Partnering with Parents to Feed Your Child**

We want to work in partnership with you to meet the needs of your child while attending school. Once the ***Diet Prescription for Special Meals*** form is completed and returned, the Food & Nutrition Manager will contact the parent/guardian to discuss the special diet. In some cases, a meeting between the parent, Food & Nutrition Manager, and District Dietitian may be needed to discuss available menu substitutions/modifications necessary to accommodate your child's needs. Once appropriate menu/food choices have been determined, the Student Nutrition Manager will place an 'alert' on your child's meal account and the appropriate menu will be followed.

To assist parents, FNS has created several tools located on the FNS Website (<http://www.leeschools.net/nutrition>)

- Nutrition information, including carbohydrate counts on all menu items
- Allergen information on the eight major allergens; wheat, soy, tree nuts, peanuts, eggs, milk, fish, and shellfish
- MealViewer (free smart phone app) and MySchoolBucks.com for obtaining a history of your child's meal choices

## **The following is additional information regarding special diets:**

### **Food Allergens**

To accommodate students that may have special dietary needs due to food allergies, including, but not limited to wheat, eggs, soy, fish, shellfish and milk, peanuts and other tree nuts, the Food & Nutrition Manager can make substitutions in meal choices. FNS does have specialty foods available such as gluten free pastas, breads, dairy free cheese but can also accommodate all allergies with other items currently available.

### **Milk Allergens/Intolerances**

For students with an allergy to milk; milk is not required to be selected as part of the reimbursable meal. Drinking water is provided at each site, free of charge, and other milk alternatives are also available for students who have completed and submitted a ***Milk Substitution*** form.

### **Diabetic/Carbohydrate Controlled Diets**

To accommodate students that may be following a restricted carbohydrate diet, nutrition information, including carbohydrate counts on all our menu items can be found on our FNS website (<http://www.leeschools.net/nutrition>) and on our menu app (Meal Viewer). The Food & Nutrition Manager **is not responsible** determining acceptable carbohydrate limits.
